## Sero-Surveillance for Corona Virus in

## Jangoan, Nalgonda, & Kamareddy Districts, Telangana

**Rural Areas**

Community-based sero-surveillance was conducted in Telangana by ICMR-National Institute of Nutrition in association with the state government- to monitor the trend of SARS-CoV-2 (COVID-19) infection transmission in the community (15-17 May 2020). This survey was part of the nation-wide survey initiated throughout India by the ICMR. In the state of Telangana, 3 districts- Jangoan, Kamareddy and Nalgonda have been selected. In each district, 10 villages were selected randomly and from each village 40 adult (>18 years) men and women were randomly included for the study. ICMR-NIN has constituted and deployed 5 teams in each district (total 15 teams) and collected around 1200 samples.

## Urban Areas

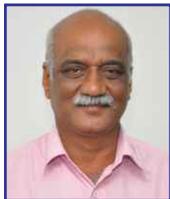

The ICMR-NIN in association with the Telangana State government conducted a rapid survey in five randomly selected containment areas of Hyderabad on 30<sup>th</sup> and 31<sup>st</sup> May, 2020. This is in continuation of the earlier district-level surveillance survey completed in 3 districts of the state as part of the nation-wide survey carried out in 13 hotspot cities in India of which Hyderabad is one. Accordingly, under Greater Hyderabad Municipal Corporation (GHMC), 5 containment zones (hotspot clusters) have been selected randomly, and 500 adults @ 100 per containment zone were randomly covered in the study. 10 teams and 5 co-ordinators from ICMR-NIN participated in the collection of the samples.
